What’s New

SUPER BRAVO™ PRO

33% thicker and more durable

Reversible, black/grey, portable marley flooring, tap ready, perfect for stage and studio. A fiberglass lining improves stability and offers better lie-flat on subfloor. Superior work surface for jazz, modern, ballet and other movement activities including tap, character and flamenco. Super Bravo™ Pro is the truly extra heavy-duty version of the classic reversible vinyl floor. $24 per sq. yd. custom cut | $2.67 per sq. ft. ($28.71 per sq. meter) for custom cut lengths to the nearest foot

SAW 10™ FREE SHIPPING IN THE CONTIGUOUS U.S.

10’ flooring for fewer seams.

Extra-wide 10’ portable marley flooring, perfect for stage and studio for contemporary, jazz, ballet and other movement activities when roll-out and roll-up time is critical. Not recommended for tap. Adhesive for permanent installation available. Available in black, grey, and white.

$2.78 per sq. ft.

SPRINGSTEP™ V

Portable floating subfloor.

Durable multi-purpose floating wood subfloor with integrated foam underlayment for all dance and theatrical activities. Springstep™ V is designed specifically for portable installations but can be installed permanently. $13–16 per sq. ft.

STORAGE AND TRANSPORTERS FOR SPRINGSTEP™ V

Transporters for Springstep™ V panels are custom made for each order. Allow 3–4 weeks for shipment. (See page 20 for additional information.) $1,000 (Approximately $75 sq. ft.)

STORAGE AND TRANSPORTER FOR VINYL FLOORS

Transporters for vinyl rolls are custom made for each order. Allow 3–4 weeks for shipment. (See page 21 for additional information.) $950 (6-Roll Transporter) $1,000 (6-Roll Transporter)

MICRON WIPESTM New Technology

StageStep’s Micron WipeSTM designed to pick up aluminum compound residue deposited by most tap shoes. The thinnest microfilament traps more dirt, dust, liquid, and bacteria than conventional microfiber. (See page 26 for additional information.)

• 5–10 times thinner than microfiber •Lint-free and non-woven, no fraying • Absorbs 5 times its weight in liquids • Washable & reusable • Fast drying $25 Pack of 10 Reusable Wipes (15 3/4” x 15 3/4” ea)

Where Do I Begin?

Prioritize your choices by answering the following questions. Then call StageStep™ to select products.

CONSIDER THE CIRCUMSTANCES

1. Do you rent or own the space? 2. Is this new construction or a renovation? 3. Will this be long-term or short-term use? 4. Do you want your floor system to be portable, permanent, or semi-permanent?

DEFINE THE SPACE

1. What kind of floor or slab is currently in the space? 2. What is the slab/floor’s current condition? 3. Where is the space (basement, first floor, home, commercial space, theatre)? 4. What is the length and width of the space (in feet or meters)? 5. Are there any unusual structures in the space (column, doors, jio/holes, radiators, steps, windows, equipment)? 6. What is the ceiling height?

What Do I Need To Know To Prevent Injury?

SAFETY

Safety is the number one issue with dancers and their teachers when it comes to floors. The first safety concern is the non-slip characteristic of the surface. Ballet dancers need very non-slip surfaces while contemporary dancers in bare feet need smooth, giving surfaces so the floor does not cause injury to the bottoms of their feet. Tappers need some give, yet also need the assurance under foot of a surface that can slide. Ballroom and theatre dance require a “fast” (less nonslip) surface. In an ideal world, each dance discipline would have its own unique floor surface. Since this is unlikely, StageStep™ offers floors that can be “adjusted” to meet the average needs of different dance disciplines. We also have finishes and treatments that can modify a floor surface to be more accommodating to other dance styles.

SHOCK ABSORBENCY

The second safety concern is the ability of the floor to absorb and dissipate energy, and/or safely return energy (resilient energy). If the floor fails to absorb or safely return energy, the body becomes the shock absorber, resulting in fatigue, pain, and injury. A performer’s resilience is concrete or any other surface that is hard and unyielding.

All movement activity generates energy. Energy directly returned to the body can result in shin splints, back and knee problems, fatigue, strains, and even broken bones. A non-energy absorbent floor or floating system is dangerous. It can result in injury and lawsuits. Concrete is non-energy absorbent. Any substance put directly on concrete does not remove you from the concrete unless it contains air (like foam). Basket weave and foam sprung floating subfloors provide shock absorbent characteristics that reduce the problems associated with hard, non-absorbent floors.

LATERAL FOOT SUPPORT

Perhaps the most overlooked attribute is lateral foot support. Without lateral foot support, the dancer cannot maintain balance. The leading cause of injury is not shin splints but ankle injury, due in part to flooring systems that rely solely on absorbent materials or systems that are too spongy. A term you may come across is “point elastic,” meaning deflection of the floor at the point of impact. The greater the deflection, the more unstable the floor.

To order, call in the U.S. (800) 523-0960 or Canada (866) 491-9019

Everything You Need To Know About Creating A Dance Studio Floor System

VAPOR BARRIER
A vapor barrier is the first step. It is always needed for installation over concrete or sub-grade floors that do not have a vapor barrier already installed. Vapor barriers prevent moisture from escaping the concrete and being absorbed by the wood subfloor, potentially swelling and warping the wood. (See page 25.)

FLOATING WOOD SUBFLOOR
A floating wood subfloor is one of the most important elements. It provides shock absorption, resilience and lateral foot support. Wood is totally suspended off the slab. (See pages 16–20.)

FLOOR SURFACES
Consider budget, types of dance activity, color, wear characteristics and texture. Avoid VCT, laminate and all non-dance floor certified products.

- Rollout flooring: All rollout floors, typically referred to as marley (vinyl) floors, are available in a variety of material configurations and a multitude of colors. Different flooring surfaces are best suited to specific disciplines. Some flooring can be used of all types of dance. (See pages 8–13.)

- Encore: A click-and-lock transportable hardwood floor with a factory finish and integrated sprung floor. No adhesive, screws or nails required. (See page 14.)

- Hardwood: For a permanent installation, a tongue-and-groove hardwood surface available in a variety of woods with a SpringFlex floating wood subfloor. (See pages 15.)

ADHESIVES & TAPES
There are four options for affixing vinyl flooring to your subfloor. Choosing the proper product for your installation depends on whether you are permanently, semi-permanently or temporarily installing your floor. (See page 24–25.)

TRANSITION RAMP
ADA safety standards require a ramp for access without any blockage for surfaces that rise 1 1/2” above the ground. Ramps are lightweight and can easily support more than 1,000 lbs. (See page 25.)

VENTED WALL BASE
Subfloors are designed, constructed and installed to leave a 1/2” gap between the floating subfloor and the wall to allow for air circulation. A vented wall base is designed to cover this space. (See page 25.)

MAINTENANCE PRODUCTS
Stagestep™ offers a variety of maintenance products and finishes to help your floor stay clean and sanitized. (See page 26–28.)

Our Best-Selling Duo

TIMESTEP™
The ultimate multi-purpose floor ideally suited for all movement activity including tap, hip-hop, ballet, modern, character, ballroom, jazz and flamenco. Heavy duty portable and permanent flooring for stage, touring and studio. Can handle heavy scenery and props. Surface can be treated for differing degrees of non-slip.

SPRINGSTEP™ IV
The professional standard for floating wood resilient permanent and semi-permanent subfloors over concrete slabs and other hard surfaces. Resilient and energy absorbent. Safety and performance at a great price.

Cushion-Backed Dance Floors

Stagestep™ offers three Dancestep™ Plus, Woodstep™ Plus, and Woodstep™ Ultra rollout floors that have heavy-duty wear surfaces and high-density foam underlayments. They can be installed directly over concrete and have very good absorency, excellent performance, but reduce the level of sound generated, which means they are not recommended for tap. They are rated ideal for residual vibration and are excellent for multi-purpose floors.

FLOATING WOOD SUBFLOORS
Stagestep™ offers multiple floating wood subfloors (Springstep™ II, III, IV, V, SpringFlex™) (with customized variations) to absorb, dissipate, and provide safe, resilient energy return.

All floor surfaces without foam backing provide no relief from a hard concrete slab. This includes wood floors placed directly on wood joists. Check the adjacent flooring charts for relative characteristics and the ideal combination for your movement activity.

Timestep™ Collection

The ultimate multi-purpose floor ideally suited for all movement activity including tap, hip-hop, ballet, modern, character, ballroom, jazz and flamenco. Heavy-duty, portable and permanent flooring for stage, touring and studio. Can handle heavy scenery and props. Surface can be treated for differing degrees of non-slip.

Super Timestep™

Ideal for ballet, pointe work, contemporary, jazz and all dance forms requiring a superior non-slip, textured surface. Durable wear layer makes for an excellent multi-purpose floor with a fiberglass reinforced lining for toe-flat quality. Energy transfer layer allows for tap and percussive dance. Flexible for easy roll-out and roll-up like a standard marley. Installed permanently with adhesive or temporarily with tape, or ReUseIt™.

Timestep™

The ultimate multi-purpose floor ideally suited for all movement activity including tap, hip-hop, ballet, modern, character, ballroom, jazz and flamenco. Made of .08” thick solid homogeneous PVC. Heavy-duty flooring for stage, touring and studio. Can handle heavy scenery and props. Surface can be treated for differing degrees of non-slip. Installed permanently with adhesive or temporarily with tape, or ReUseIt™.

Timestep™ T

Made of same material as Timestep™ (solid PVC) but 25% thinner and lighter for delivery. Heavy-duty, portable and permanent flooring for stage, touring and studio. Can handle heavy scenery and props. Surface can be treated for differing degrees of non-slip.

CUSTOM COLORS AVAILABLE IN FULL ROLLS ONLY

Allow up to 6–10 weeks for delivery.

Our Customers Say It Best

“We are very happy with our Stagestep™ floors at our historic studios in New York City—so when we built our new extension in Long Island City, there was no question whom we would call first. Stagestep’s SpringFlex™ subfloor systems and rollout Super Timestep™ vinyl flooring are high-quality, durable, and a tremendous value. They handled everything from selecting the most appropriate floor for our needs to installation. Our instructors and students have been dancing on our new floors for two months now and they are thrilled.”

F. Lee Merwin
Director of Operations, Jeffrey Ballet School

Atlantic Blue: Timestep Only

Cherry: Timestep only

Aluminum compound taps can disintegrate on flooring, leaving a black/grey residue. See maintenance instructions online at stagestep.com. To avoid this residue, use aluminum or steel taps. Use TapShield (page 25) or FloorShield Maintenance System (page 28) to lessen this problem. For Microon Wipes (see page 26).

To order, call in the U.S. (800) 523-0960 or Canada (866) 491-9019

Woodstep™
Woodstep™ has the look of real wood

- Easy install
- Great for dance

Quietstep™
Quietstep™ is a protective and sound absorbent covering that provides comfort and positive feedback for all types of dance, including pointe work.

Woodstep™ Plus
Woodstep™ Plus has all the qualities of Plus with extra shock absorption provided by a dual-density foam backing. Recommended for ballet, jazz, modern. Not recommended for tap (due to cushion-backing which mutes sound). Can be installed directly on a concrete slab without a floating subfloor.

Woodstep™ Ultra
Woodstep™ Ultra has a dual layer cushion base for extra energy absorption.

Dancestep™
Dancestep™ Plus is a cushioned-back flooring designed to be installed directly on a properly sealed concrete slab. Textured wear layer makes for a non-slip surface. Great for all styles of dance except tap (due to sound reduction). Dancestep™ Plus has a dual layer cushion base for extra energy absorption. Dancestep II is discontinued.

Quietstep™
Quietstep™, the performance floor for ballet can also be used for contemporary and jazz. Cushion-backed flooring reduces sound. Non-slip surface ideal for pointe work. Not recommended for tap (sound muting).

Dancestep™
Dancestep™ Plus has a dual layer cushion base for extra energy absorption.

Encore™ Wood Flooring Collection

Exceptional real hardwood design combines form and function. Encore™ is the revolutionary “click-and-lock” transportable hardwood floor with a factory finish and an integrated sprung subfloor. Recommended for virtually all activities including tap, jazz, modern, ballet, and multi-purpose use. Encore™ Elite uses maple hardwood for a harder, more durable surface. FloorShield™ II is recommended for ballet and for easier cleaning of tap shoe residue. (See page 28.)

INFORMATION ABOUT INSTALLATION AND MAINTENANCE IS PUBLISHED ON OUR WEBSITE
SpringFlex™ SubFloor System

The professional standard for floating wood resilient permanent subfloors for use over concrete slabs and other hard surfaces. This subfloor is resilient and energy absorbent. Safety and performance at a great price.

21st century state-of-the-art basket weave subfloor system. Pre-manufactured from cross-laminated birch and recycled rubber. Allows for easy installation of a professional subfloor system

Our Customers Say It Best

“When we built Starwest Studios in Hollywood, a state of the art broadcast dance studio, before all the lights, cameras and action, we had to lay the foundation. That is when we decided to install the best, a 3800 square foot Stagestep™ sprung wood dance floor. Our choreographers expect only the best! Starwest Studios has the largest sprung wood floor in Los Angeles, 4x6 foot with a white Cyc for filming dance.”

Sammy Oriti, Creative Director
Starwest Studios

Prices and discounts are in USD and are subject to change without notice. For pricing in other currencies, please call (215) 636-9000 or email sales@stagestep.com. Stagestep provides only the foam underlayment, plus all the instructions and phone support you need.

---

Springstep™ Floating Wood Subfloor Collection

Multi-purpose floating wood subfloor for all dance activities. Select resilience (spring) and absorbtancy suitable for what you do. The only custom transportable subfloor on the market.

Springstep™ II—Build It Yourself

Resilient floating wood subfloor that comes 2 3/4” (69.85 mm) or 1 1/2” (38.1 mm) off the slab. Will amplify sound levels in the room. Ideal for all dance styles. Springstep™ II consists of 2 layers of 1/2” (12.70 mm) underlayment grade plywood resting on two-inch resilient foam cubes (100 cubes per 4’ x 8’) or 3” x 3” x 3/4” nominal high foam blocks (52 per 4’ x 8’). Springstep™ provides only the foam underlayment, plus all the instructions and phone support you need.

Estimated Costs: Costs cannot be estimated at this time due to the rising and fluctuating cost of wood due to Covid 19.

Springstep™ III—The Ballroom Alternative

The most absorbent and least resilient of the subfloors, comes 1 1/2” (38.10 mm) off the slab. Reduces sound levels and works exceedingly well for ballroom dance.

Springstep™ III consists of 2 layers of 1/2” (12.70 mm) ply resting on 1/2” (12.70 mm) cross-link cell foam sheeting covering the entire slab. Specifications are the same as Springstep II except for 1/2” (12.70 mm) foam sheeting. Stagestep provides only the foam underlayment.

Estimated Costs: Total cost including plywood—$3.20 per sq. ft. (See page 16 for foam sheet pricing.)

For detailed illustrations and installation instructions, visit stagestep.com/subfloor-systems/springstep

Telegraphing does not effect performance or wear. It is not a defect. Most floating subfloors will telegraph seams from below.
At A Glance

- Do it yourself in hours instead of days
- No hardware, screws, patching, or sanding
- Safe
- Cost-effective
- Improves performance
- Eco-friendly
- Choice of multiple systems for any movement activity
- Transportable
- Includes the wood and shock absorption
- Recyclable
- Snap together patented tongue and groove construction layer

Springstep™ IV

The professional standard for floating wood resilient permanent and semi-permanent subfloors for use over concrete slabs and other hard surfaces. This subfloor is resilient and energy absorbent. Safety and performance at a great price, for studio, stage or home.

Springstep™ IV

The easy subfloor. The nominal 2’ x 2’ pre-fabricated OSB panels, with patented tongue and groove connection system, rest on “L” shaped high-density foam suspension forms. Springstep™ IV offers excellent energy absorption and resilience. Panels are sealed for water resistance. Its tongue and groove system allows for easy assembly.

The lightweight 6.5 lb panels can be installed in hours instead of days. No screws. No staples. No nailing. No sanding. It is 1/4 the work with no tools required.*

Easy to disassemble, move to a new location, and re-install.

*Circular saw will be needed for custom fit.

For detailed illustrations and installation instructions, visit stagestep.com

**Our Customers Say It Best**

“In more than 25 years in the business, I have been able to rely on Stagestep™ for all of my dance floor needs. Their dedication to excellent customer service and commitment to their clientele is a perfect match for my own. As a small business owner just starting out, I was treated with the same respect and consideration that I now enjoy as the COO of the largest rehearsal studio company in the world. Stagestep™ is the best in their business, and have been instrumental in helping us become the best in ours.”

For use with cushion-backed floors. Super Bravo™, Super Timestep™
4 Gallon Pail ........................................... $225
20% off with flooring order ........................................... $180
One gallon covers 15 sq. yds. (13m²)
One bucket covers 540 sq. ft. (52 m²)

Transition Ramp
Lightweight, poly-resin transition piece is fully portable and easy to install. It can be placed and relocated without the use of permanent fasteners. The ramp is non-marring and anti-slip. Strong enough to support over 1,000 pounds. Includes an easy-to-use velcro strip for installation.
Custom sizing available. Call for pricing.
36" wide x 1 1/2" high x 8" slope ........................................... $80

Springstep™ System
New improved formulation.

The ReUseIt system gives you all the benefits of a permanent installation with the ease of a semi-permanent installation—without the use of top tape or the hassle of resetting your floor every two years. When you need to remove the floor, you simply peel it up and take it away. Purchase a new supply of ReUseIt™ and install at your new location. Used ReUseIt™ is removed from the sub-floor and thrown away. This is a DIY product. Just follow the easy directions that come with each roll.

Full rolls only ........................................... $180
3 1/4" x 82 1/2" = 268 sq. ft. (1 lm x 25 lm)
Save 10% when purchased with flooring. $162

Note Not for use with Timestep T.

Caution Exposure to extreme or variable heat conditions can cause failure. Contact Stagestep™ with questions.

For use with Springstep™ IV system.
(Other subfloor systems have not been tested.) Installation instructions are available online at stagestep.com

Prices and discounts are in USD and are subject to change without notice. For pricing in other currencies, please call (215) 636-9000 or email us at sales@stagestep.com. Call in the U.S. (800) 523-0960 or Canada (866) 491-9019

Stagestep FloorShield™ II

NON-SLIP ADVANCEMENT: REDUCED COST

Application of a Stagestep FloorShield™ II Finish can be completed in 4 – 6 hours. Needs 48 hours curing time.

The FloorShield™ II line of finishes delivers all these benefits:
- Easy application
- A floor finish that significantly reduces maintenance, and keeps delivering on-slip coefficient of friction for every type of dance
- Floor renovation without replacing your floor
- A floor finish that lasts up to 12 months
- A floor finish that is bio-degradable.
- Shelf life one year

FloorShield™ II Cleaner
The multipurpose, neutral, cleaner should be used only on FloorShield™ II Finish treated floors.

Single (1 gallon)........................................... $45

* Microfiber mop (18”) frames and mop backing with sponge board to be locally supplied.

Flooring Rental Policy

Three-day minimum rental period.

- $400 deposit is required for each rental of 4 rolls or less and $100 for each additional roll.
- Deposit will be returned at the conclusion of rental when the floor is returned clean and in good condition.
- Renter is expected to return rolls floored on cardboard tubes and packaged properly for transport to Stagestep.
- All rentals will include cost of shipping both directions which will vary with number of rolls and destination.
- Always compare cost of purchase versus the rental cost. It may be less expensive to buy in the long-term.
- Call Stagestep for complete costing including deposit and freight.

Floors cannot be cut for any reason. You cut them, you own them. Credit card will be charged for full cost of the roll less 20% discount.

Our Customers Say It Best

“The Joffrey Ballet School has been working with Stagestep™ for decades. They have earned that relationship with outstanding knowledge, professionalism and pricing. Their customer service is second to none and their personal attention and honest caring makes Stagestep™ the only place the Joffrey Ballet School trusts.”

Christopher D’Addario
Executive Director, Joffrey Ballet School

Check stagestep.com for availability, prices changes, special sales, new products, and answers to your flooring questions. Sign-up online to receive our weekly emails. Follow us on Facebook and Twitter.

HOT RUSH DELIVERY SERVICE
When you have little or no time between ordering your floor and your studio opening or upcoming performance, you can rely on the STAGESTEP™ Hot Rush Delivery Service. Ask a STAGESTEP™ representative for details. Expedited shipping & handling is also available at an extra charge.

Our Preferred Financing Partner

Crestmark
Crestmark Vendor Finance, a division of MetaBank®, has many comprehensive lending options designed to meet the needs of the small business owner.

Applications are available online at https://tinyurl.com/wb6hz2x or contact Maite Echevarria at (854) 634-0425 or maite.echevarria@crestmark.com. Certain restrictions apply.

*(See page 31 for Terms and Payment.)*

Terms & Conditions

AVAILABILITY
For items in stock, shipment is typically made within 24–72 hours, excluding weekends and holidays. For special orders including wood flooring, allow 3–6 weeks. Call STAGESTEP™ for earliest shipment date.

SHIPPING & HANDLING
Flooring will be shipped FOB Philadelphia unless otherwise arranged. All other products will be shipped prepaid UPS or FedEx unless shipped with flooring via interstate trucking. All freight prepaid.

For online orders to be shipped outside the contiguous United States, call or email to receive shipping & handling cost and to place an order.

For shipments outside the contiguous United States, orders ship via UPS International or Federal Express. Please call for shipping & handling cost.

STAGESTEP™ is not responsible for delays in shipping & handling once product has left our warehouse.

Flooring is shipped via interstate trucking at customer’s directions. Cost is determined by weight, cubic size, and mileage. STAGESTEP™ will be happy to quote shipping & handling costs. We discount all published rates.

To order floorcare products or installation products, shop 24 hours a day online or call (800) 523-0960, during business hours.

Shipping & handling for most online purchases are free in the 48 contiguous United States. We charge for shipping & handling for online orders to states outside of the contiguous United States. Call for shipping cost for other locations.

TERMS & PAYMENT
Purchase orders accepted from city, state, and federal institutions and public school systems. Net 30 days. All other orders must be prepaid. We accept credit cards (MasterCard, Visa, Discover, PayPal, and American Express), checks, and money orders for U.S. and Canadian currency. We can also provide current exchange rate for foreign currency.

Please note that truckers will not make inside deliveries. It is your responsibility to transport flooring from the truck into your facility.

All information and pricing superseded materials published prior to January 2020. All prices and product specifications subject to change.

DAMAGED SHIPMENT AND CLAIMS
Any non-concealed damage to your shipment must be noted on shipping & handling documents at time of receipt. Photo documentation should be sent to STAGESTEP™ to facilitate all claims. If you experience any problem with a STAGESTEP™ product, you must notify us within 72 hours of receipt to validate, exchange, credit, or file insurance claim. Installation of flooring denotes acceptance.

CMG Flooring is a certified Stagestep dance floor installer. CMG will travel to provide professional flooring installation tailored to your studio. They can install your subfloor system, flooring, vinyl or wood, ballet bars and mirrors.

Our reputation and your satisfaction are of the utmost importance to Stagestep and CMG. CMG guarantees the workmanship of our flooring installation for the life of your studio. Certain exclusions apply (climate control, original floor installation choice, maintenance of floor, etc.) Travel fee and expenses to be paid by the customer for all site visits.

CMG Flooring is an owner operated company that began in 1999 by Chris Grant. We are on a 100% referral basis. Ask for a custom installation quote through CMG.
